    Welcome to Plasma Donation Website. As we all know, the world is
suffering
    from the COVID-19 crisis. Our government and health care professionals
are
    trying their best to help the patients suffering from COVID-19.
Scientists
    are trying to discover a vaccine to cure people affected with
coronavirus.
    There is a scientific way from which we can help to lower the death
ratio
    or help the COVID 19 affected person. Plasma therapy is an experimental
approach to treat COVID-positive patients and help them recover faster.
    But, in this situation, it is difficult for a patient to find a plasma
donor as everybody can't donate plasma.
